

Project Consultancy Solutions

Our team of experienced consultants have been providing a broad range of services to clients for over 12 years. We offer depth of experience with flexible solutions designed to quickly and cost effectively deliver results.

Determine and enhance your project practices, methods and capabilities including PMO and Portfolio Management development.

Consulting

Methodology Development

Development of best-practice project or programme management methodologies tailored to your needs to provide a consistent, streamlined way of working improving communication, overall performance and customer satisfaction. This can also involve 'refreshing' an existing methodology to reflect current industry practice.

Competency Assessments

Conducting workplace interviews and online questionnaires to assess and benchmark a competency standard for individuals and a wider understanding of organizational strengths and weaknesses.

Project Management Maturity Modeling (PMMM), Audits and Reviews

Surveys and assessments that identify organisational maturity, strengths and weaknesses at any level, then quickly identify improvement opportunities. We can also offer audits, reviews and recovery programmes for individual projects.

Project Management Software Implementation and Customisation

A range of services from product selection advice, development of custom templates in Microsoft Project, the development of a project management database to a full deployment of MS Project Server and Microsoft Enterprise Project Management Solutions.

Project Management Office (PMO) Implementations

The establishment of efficient reporting and supporting mechanisms for multiple or large projects and programmes. Creating the resources and processes required to support the success of a single project or program or maximize your organization's investment in projects and programs across the board.

Programme and Portfolio Management

The review or establishment of Programme and/or Portfolio Management standards to optimise your organisation's investment in projects and programmes.

Coaching and Mentoring

On-site structured and interactive on the job-oriented coaching from a seasoned professional that will focus on personal performance so benefits are realised across many projects.

Service Management Assessments & Implementation to the ITIL Framework

Our assessment helps you to understand how your processes compare with the ITIL best practice framework so that opportunities to improve business efficiency and effectiveness can be identified. ITIL standards can be applied to your business' operating processes.

"The real benefit to our organisation from PMPartners group, and specifically Peter Swan, is the strategic management and direction provided through consultation. This includes the formalisation of an operational service product growth and management structure to the tool for deploying the strategy."

PMPartners Client

Capability development using **people, process and technology**

With today's need to spend less and accomplish more, organisations need effective people, processes and technology in order to deliver projects and programmes successfully.

At PMPartners we understand the challenges facing today's organisations and are on hand to help with a practical business orientated approach. We work closely with our clients in these three key areas to ensure project performance is optimised in line with strategic goals, leveraging our wide knowledge and experience to design and implement joined-up, measurable solutions.

> People

Ensuring you have the right people with the right skills working on the right projects.

At PMPartners we know what makes a good project manager. We can assess and benchmark your team members and develop tailored development plans to get them where you need them to be.

It is people that make projects succeed or fail. We can help you select, develop, motivate and retain the right people to ensure consistent project success.

> Process

A consistent, proven approach

Research from the Standish Group shows that projects are 30% more successful when executed using a common process.

In addition to building or updating your project and programme management processes we can optimise your PMO or introduce portfolio management to ensure that your projects and programs are prioritised and appropriately resourced.

We combine accredited, best-practice methods with the uniqueness of your organisation to develop and implement sustainable solutions that will enable you to consistently deliver your goals.

> Technology

Systems and tools to organise your information and communications.

The best people using the best methods still need to organise and present their work in a practical way that enables information-sharing and collaborative working.

From basic software training to implementation of full Enterprise Project Management systems PMPartners technology solutions will give you the visibility and control to make effective decisions across your portfolio when and where you need to.

We'll also ensure that technology is implemented in partnership with behavioural change to gain the maximum business benefit from your investment.

"The methodology provided is able to be modified to reflect the client needs while not losing the necessary discipline to keep a project on-track and ensure the deliverables are actually delivered when scheduled.

I seriously think that because PMPartners specialise in Project Management instead of being 'all things to all people' our needs were served far more comprehensively than if we had sourced from other companies.

I would be pleased to act as a reference to any party interested in securing competent, pro-active support in the area of Project Management".
